Narrative report

Runda 1. Custodes: zmiana wyniku o +12 VP. Necrons: zmiana wyniku o +9 VP. Nieustalone źródło zadał 1 Wounds jednostce Trajann Valoris po rozpatrzeniu alokacji; pozostałe modele: 1, bieżący model ma 6 W. Nieustalone źródło zadał 1 Wounds jednostce Trajann Valoris po rozpatrzeniu alokacji; pozostałe modele: 1, bieżący model ma 5 W.

To podgląd trwającej bitwy; wynik nie jest końcowy.

ROUND BY ROUND

Battle timeline

▼ **Round 1 · 4 highlights**

- SHOOTING · Custodes: Primary +12 VP
- SHOOTING · Necrons: Primary +9 VP
- SHOOTING · Unknown / environment → Trajann Valoris: 1 Wounds lost · 1 model remaining · current model 6 W
- SHOOTING · Unknown / environment → Trajann Valoris: 1 Wounds lost · 1 model remaining · current model 5 W

How to read these statistics

Combat ROI = net enemy points destroyed / own starting points × 100%. Model value is an estimate: unit points / starting models. Restoration and model corrections remove the most recent outstanding credits across rounds. The last hit earns the kill, which is removed if the target returns.

Logged damage uses effective Wounds from Combat Logging and legacy explicit single-model decreases. Model-only losses and whole-unit KO infer no damage. Healing and restoration preserve gross damage; corrections retract mistaken loss. — means no recorded data, and Partial means only recorded damage. Action VP needs one unambiguous unit; joint awards remain unassigned. Objective control does not identify a capturing unit. Score corrections make previous action VP attribution uncertain.

This report describes recorded events. Unrecorded actions and missing sources cannot be reconstructed.
